

Clear Water Services

JOB DESCRIPTION

Environmental Technician

Position Description Summary:

Clear Water Services is a leading environmental services firm that is dedicated to providing customers with innovative turn-key solutions to challenging water quality problems. We are proud to offer the most cost effective solutions in the market, while protecting our environment from harmful pollutants. Our water quality and environmental work ranges from system design and installation, to operations and maintenance.

Clear Water is seeking a motivated, bright and enthusiastic individual for the position of Environmental Technician. Your primary responsibilities will be to assist project managers and perform bench and pilot-scale water characterization and treatability studies; analyze water treatment data and prepare reports, and help with development of standardized tests; provide input in treatment system design; general treatment system maintenance, troubleshooting and problems solving; assist with research and testing of new water treatment technologies; submit samples for analytical testing.

You will also operate PLC controlled treatment systems to achieve the goals established by the specific project permit for water quality at various jobsites and conduct Certified Erosion and Sediment Control Lead (CESCL) inspections.

Successful candidate will demonstrate proficient communication with Project Managers regarding project material/equipment needs; maintain positive field relationships with customers, contractors, suppliers and other employees; assist the Safety Manager in ensuring all employees and contractors are adhering to safety policies.

Academic & Experience Requirements:

- Bachelor's degree in engineering (Chemical, Civil, Environmental, or Mechanical), environmental science or chemistry
- Relevant work experience in engineering/environmental/lab role
- Stormwater and wastewater treatment operation/permitting/consulting experience a plus.
- AutoCAD experience a plus.

Key Knowledge/Skills/Attributes

Excellent organizational abilities, customer service skills and good communication skills. Must be able to effectively interface with customers and vendors.

Must be a team player and help out where needed, yet self-motivated to work independently.

Must have excellent technical writing skills. Experience writing SWPPPs, Water Treatment Plans, and Lab Reports is a plus.

Physical Requirements:

Must be able to work under weather conditions in a construction or industrial environment. Must be able to lift 50 pounds. Must be able to travel and have a good driving record.

Interested parties should submit a resume and cover letter to: jobs@clearwaterservices.com
